

Certificate of Validation

Dataworks Development, Inc. hereby certifies that its latest product, Freezerworks® Basic version 7.2, has been developed using the highest possible design and coding standards as set forth in the Dataworks Software Development Life Cycle.

Freezerworks Basic 7.2 has undergone formal in-house testing and validation in the Windows and Macintosh operating systems. The validation test scripts are written to ensure that the software program performs in a manner consistent with the approved functional specifications for this version. They include new code tests as well as regression testing.

Dataworks will maintain validation documentation on-site at the main Dataworks offices in Mountlake Terrace, Washington. Access to the documentation will be available to customers (non-disclosure agreement required) and authorized governmental or regulatory agencies.

Freezerworks Basic 7.2 has passed all Dataworks validation requirements and procedures and is hereby approved for release on July 5, 2013.

A handwritten signature in blue ink that reads 'Shannon Murray'.
