

Barcode Labeling

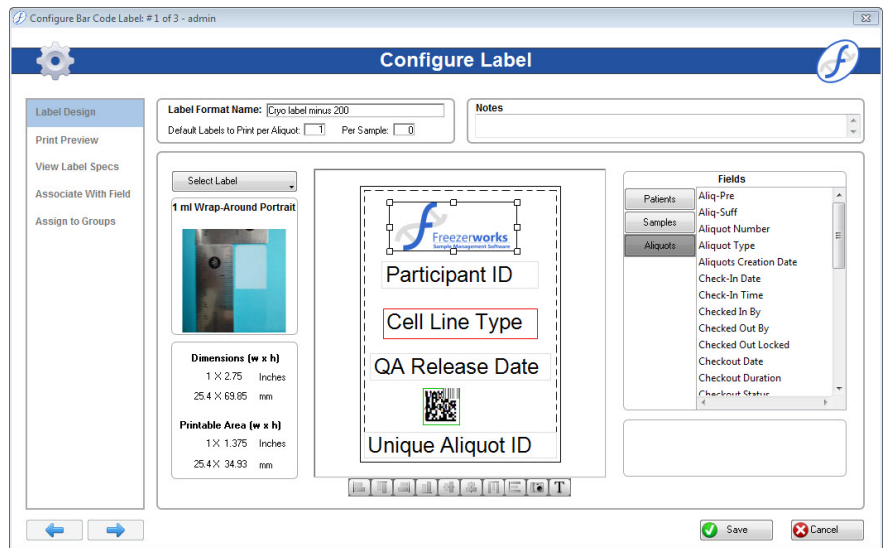

Freezerworks
Sample Management Software

Run your repository like a library. Use the built-in and configurable barcoding features to print cryogenic barcode labels. Later, use the search and batch update features to locate, pull, and check out samples. When samples return, check them in with ease. See our website at www.freezerworks.com for an assortment of labeling options.

New printing features in Freezerworks 2015:

- Print graphics, add your company or institution logo
- Include any combination of patient, sample and aliquot data
- Improved interface for greater print accuracy and ease of use (what you see on the screen is what you get on the label)
- Streamlined printer-label interface. All Freezerworks supported printers will print all Freezerworks supported label formats
- Preprint labels for clinical trial kits, and be prepared for the receipt and processing of samples, greatly streamlining sample storage

Label options for:

- Low temperature and cryogenic storage (-20, -80, -190)
- Labels for slides, vials, and tubes of varying sizes
- Wraparounds, labels for frozen tubes
- See freezerworks.com for available sizes and assortments
